DETAILED ACTION

1. Claims 1-24 are pending.
2. Examiner acknowledges Applicant's election of Group I, claims 3-6 and 8 filed on 09/18/2006.
3. Claims 1-6, 8 and 11-12 are elected as they read on a pharmaceutical formulation for preventing or treating allergies comprising an isolated protein.
4. Examiner apologizes for the inconvenience, but upon further consideration, the following species election is set forth below.

Species Election

5. Applicant is further required under 35 U.S.C. 121: (1) to elect a single disclosed species to which claims would be restricted if no generic claim is finally held to be allowable and (2) to list all claims readable thereon including those subsequently added.

Applicant is required to elect a single disclosed helminthic antigen species, for example, as recited in Claim 6 and selected from *Capillaria hepatica* or *Dicrocoelium dendriticum*.

These species are distinct because the proteins will differ in structure, physiochemical properties and modes of action; therefore each species is patentably distinct.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nora M. Rooney whose telephone number is (571) 272-9937.

Art Unit: 1644
